Special Attractions At Old-Time Concert

The Committee of the Ladies' Aid in charge of the Old-Time Concert, planned for Friday, May 4th, in Campbell's Hall, is now in a position to announce certain items which will form part of the programme.

Miss Marie Moffatt, an ever-popular young soloist, will contribute two selections. Miss Mervin McDougall will add variety to the entertainment by a dance number. A chorus by the Pupils of Blount School, directed by Miss Roberta Campbell, is an attraction extraordinary. Inspector Crispo especially commended the teaching of music as carried on in this school.

The High School Orchestra, a group of talented and peppy young people, who are always sure of a welcome from Champion audiences, will be heard again. Mr. J. M. Moffatt is planning to present his male quartette—you may remember their performance as one of the outstanding numbers of last year's Irish programme. Miss Ada Williamson, Misses Ruth and Gladys Anderson, who were so well received at the Sunday School Christmas concert, are again preparing a vocal trio. Bob McDougall and Max Caldwell are racking their brains for ideas for an original pantomime, which will be of interest to the community at large. They have become quite famous for these performances at the meetings of the High School Literary Society.

Other individual numbers will include piano solos by Misses Roberta Campbell and Margaret Patterson, violin solos by Miss Gladys Rhodes, vocal solos by Mrs. Nelson, Miss Barbara Wise, and Mr. Campbell—and a number by Mr. Dawson and Mr. Campbell, the nature of which is not yet divulged. It is hoped so, that we shall be able to persuade Miss Beulah Walker and her brother Billy, from Vulcan, to contribute to our programme.

Next week details regarding the one-act play, "Rats" will be ready for publication.

An enjoyable evening is assured. You will get more than your money's worth. Make it a family night out. Admission 25 and 15 cents.

Household Drudgery
The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. It is only under the heaviest nervous and irritable, has indigestion, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's Health Nerve Pills a remedy to strengthen the system and bring back the much desired health.

A Record Of Service

Forty-four years as member of any parliament, even in the inconspicuous role of a back-bencher, would be an impressive record of service and endurance. It would indicate, at the very least, a tremendous capacity to resist boredom and endure platitude.

Forty-four years as member of the British parliament, where the M.P.'s job is pretty much a full-time affair, is almost a transcendent feat, for, at Westminster, oratorical standards differ but little from those of parliaments and legislatures nearer home.

Forty-four years as member of the British parliament, thirty of them in the very forefront of political policy, twenty of them in the role of an imperialist as well as a national figure, and at least ten of them in the role of a luminary, represents something, however, which cannot be judged by ordinary criteria.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 10—SENDING THE WHOLE CHILD TO SCHOOL

In years gone by the physical side of life was much more neglected than it is today. In recent years we have given more attention to the value not only of life itself, but also of those things which make life worth living.

Most modern school systems have developed a health program, including on their staff health officers to look after the physical well-being of the children.

There are many physical defects which might retard the child in his school work but this article is intended to stress the prevalence of eyestrain and its attendant evils.

About three people out of seven use eye glasses to-day for some purpose but it is estimated that every ten of ten should be wearing them. This almost universal need for assistance in modern civilized life is largely due to the constant use of the eyes at close range and almost constant exposure to "glare" from sidewalks, roads or buildings, printing on glossy paper and from high-powered electric lights.

Modern life demands modern equipment and it is the constant use of the eyes for close work that has made scientific glass-fitting a great scientific human need.

The strain of civilized life falls most heavily upon the eyes, the most delicate and the hardest worked of any of the organs of the body. This is especially true of school children because a child's eyes are immature; they are baby eyes until he has reached the age of proper development and too frequently he is required to do the work of a man, to read a full load for many years.

There are twenty-five million young people in the schools of this continent and it has been found by actual survey that twenty per cent. of them have eyes which are so completely out of focus that it is interfering with their progress in school. The fact that they are so young and that they are so immature makes the problem of their eyes a very serious one.

Millions of young people are handicapped by their eyes. The fact that they are so young and that they are so immature makes the problem of their eyes a very serious one.

Wizard At Illumination

Nova Scotia Man Planned Many Spectacular Lighting Effects

Walter D'Arcy Ryan, famous creator of lighting effects and director of the illuminating engineering laboratory at the Schenectady works of the General Electric Co., died recently of a heart attack at his home in Schenectady.

Born in Kentville, Nova Scotia, 62 years ago, the son of the late ex-Mayor and Mrs. J. W. Ryan, Walter Ryan had for many years been known as the "wizard" of illumination.

He was the man who had outdone the Aurora Borealis or the scintillating stars of a moonlight night with electrical effects of his own devising. For instance, the illuminating of Niagara Falls, the magnificent lighting effects of the Panama Pacific Exposition in San Francisco; those of the Exposition in Rio de Janeiro, Brazil; the Washington Arms Conference; the Silver Jubilee of the City of New York; the Art of Victory in Chicago; the Republic League Sunburst, during the National Conference in Kansas City, and his most marvelous achievement was in the lighting of the 1933 World's Fair in Chicago.

Of this Nova Scotia-born engineer, Thomas A. Edison once said: "This man Ryan has performed miracles."

New Radio Telephone

A novel ultra-short-wave radio telephone sending outfit, operating entirely from self-contained dry batteries, which weighs 15 pounds and is capable of sending spoken messages clearly over distances of more than a mile through city streets, has been developed.

The wave-length utilized is 100 centimeters or about 39 inches.

Making Further Experiments

M. Georges Claude's vessel, the *Thaïs*, is being equipped, and shortly will be ready for further experiments in producing cheap power from the sea. The vessel is of 10,000 tons and has a complete set of plant capable of producing 2,500 horsepower. Two-thirds of this power will be used to operate an ionizing machine, for Claude expects to anchor near the shore of some tropical place and make ice
